

SchoolCMS Modules

A wide selection of easily applicable functions

Extended modular system and various functions make for a simple, accessible and easy to use system.

- "What You See Is What You Get!" – Creating your own web pages in the browser – even without knowledge of HTML – is child's play
- Media administration for pictures, animations, sounds and downloadable documents
- Multi-lingual user interfaces, completely operable through standard web browsers
- Automatic full-text indexing and search engine for the portal and project areas
- Automatic site maps and navigation elements
- Context-sensitive help functions
- Pin boards and discussion forums
- Document depot
- E-mail-form module
- User authentication through LDAP and display of current users
- Export of your content as static HTML, i.e. for CD-ROM archiving

Optional modules and services

- HTML-Newsletter transmission
- Tailor-made web design
- Integration with the StudyWiz VLE by Etech Group

SchoolCMS Technology

Platform independent and expandable

SchoolCMS runs on any server operating system that includes an Apache 1.3 / MySQL / Java 1.4 environment (MacOS X server or Linux is recommended).

SchoolCMS can be used from any computer (PC, Mac, Linux) that has a network connection to the SchoolCMS server and a modern, standards compliant web browser. No need for any additional software or browser plug-ins.

The screenshot shows the SchoolCMS web interface. The main content area displays a project page titled "Experiment Photosynthese - Planung". The page lists upcoming dates for the experiment: Thursday, October 13, 2005, 17:30 Uhr, Room E05; Monday, October 17, 2005, 10:00 Uhr, Room E05; Tuesday, October 18, 2005, 11:45 Uhr, Treffpunkt Sekretariat; and Thursday, October 20, 2005, 17:30 Uhr, Room E05. There is also a section for "Bemerkungen" (Remarks) mentioning a student speaker on October 18th.

Overlaid on the bottom right of the screenshot is a "Permissions" table. The table lists various permissions and the access rights for different user groups.

Permissions	Administratoren	Learning Designer	Lehrer	OnlineDemo	RSWM

Networked learning – available anywhere and anytime

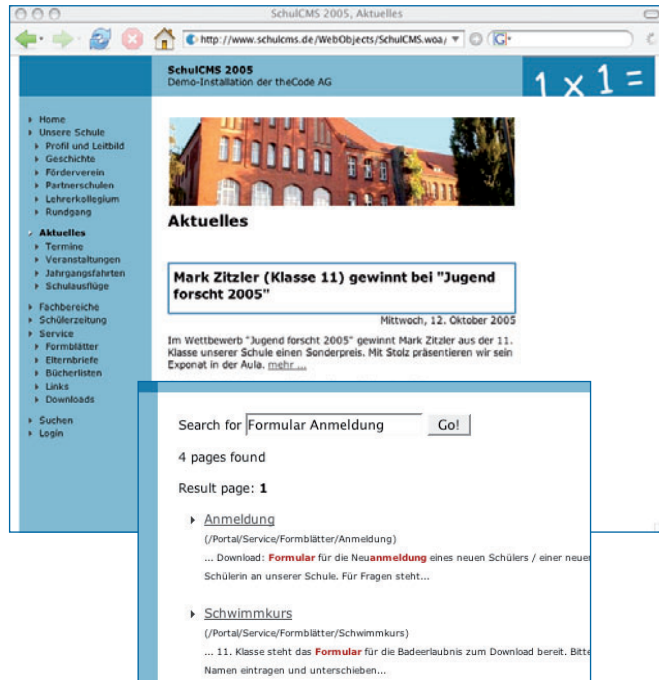

Learning Content Management System

Online teaching and learning

SchoolCMS is a Learning Content Management System specially conceived and designed for use in schools. Its special strength is the simple creation of your own web content based on the "What You See Is What You Get" principle. Server-based, SchoolCMS is as easy to use as any text-editing program – without need of special knowledge of HTML or programming you can create and manage your own school home page.

Open to students, teachers and parents – the SchoolCMS portal

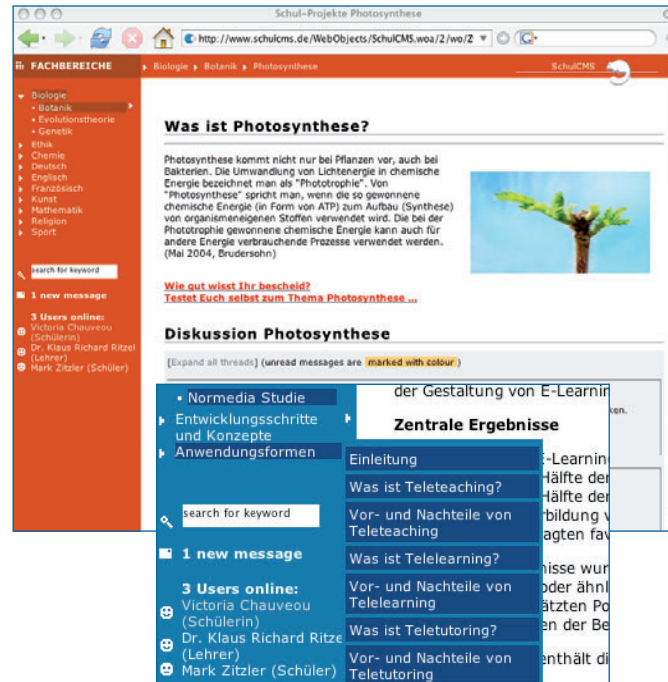

Through the portal area of SchoolCMS you can publish everything anyone needs to know about your institution. Keeping the school website up to date, emailing parents, posting class handouts or sharing pictures of a recent field trip – SchoolCMS makes it easy.

E-Learning for schools

Members Only – the project area

The project area can contain an unlimited number of virtual classrooms – here only the teachers and students with the correct authorisation may enter. These protected areas – along with the easily uploadable learning content with both text and images – also contain further interactive modules like discussion forums, pinboards and document depots to further enhance and support modern teaching methods. Student cooperation and social integration are encouraged and fostered.

Learning at home online

An additional option is for students and teachers to work from home through a secure connection to SchoolCMS. This is possible because SchoolCMS is a solely server-based software. The client computer requires no additional installed software – not even any browser plug-ins or extensions. A simple, standards compliant web browser is all you need. SchoolCMS can be used on any PC, Mac or Linux-based computer.

SchoolCMS from theCode

The specialists for e-learning

theCode has been developing e-learning solutions since 1995. Our products are currently being used by universities and general education school districts. SchoolCMS is available at reasonable licensing prices including hosting and full service options. In cooperation with Etech Group, theCode offers world-wide support and customized solutions tailored to your specific needs.
